APPENDIX K

PRE-CONTACT MAP OF CANADA
This map is the most comprehensive ever created of the First Nations of Canada. It utilizes the original clan titles, names, and places from each Nation, and shows a Nation was originally before contact. It identifies all known names of the Nations who survive today, as well as those that did not, honoring the memory of those who have passed. It is a tool to focus on an important idea: that all of Canada is a visual reminder of those who have called it home, time and time again, creating a sense of pride for future generations. As it connects us all as First Nations people to the non-Native public, it encourages First Nations peoples to think about our ancestral homeland.
