

# Costly Choices

## KWL Chart/Graphic Organizer

Complete the first two columns of your KWL chart. After reading the article “What’s In A Cigarette?” add your new learning. Use the information about the cost of cigarettes to calculate how much money a smoker spends in 1 year, 10 years and 40 years.

**What I know**

A large, empty rectangular box with a light green background, intended for students to write what they know about the topic.

**What I wonder**

A large, empty rectangular box with a light yellow background, intended for students to write what they wonder about the topic.

**What I learned**

A large, empty rectangular box with a light blue background, intended for students to write what they learned from the article.

### CALCULATING THE COST OF SMOKING

1. How much does it cost a smoker for 1 year of cigarettes? Show your calculations. \_\_\_\_\_
2. How much money would a smoker spend after 15 years of smoking? \_\_\_\_\_
3. How much would it cost a smoker to buy cigarettes over 40 years? \_\_\_\_\_
4. Reflect on the consequences of smoking over time (health and financial) \_\_\_\_\_
